PRESIDENT'S DEPARTMENT.

Instruction is given by the President in Political Economy, Biblical Literature, Butler's Analogy, Moral Philosophy, International Law, Constitution of the United States, Logic, Natural Theology, Evidences of Christianity, Mental Philosophy, Rhetoric, and History of English Literature.

DEPARTMENT OF LATIN.

In addition to the necessary Preparatory Course, eight Terms are devoted to the Latin Classical Authors, ending with the first Term of the Senior year, together with exercises in Latin Prose Composition, continued through the Freshman and Sophomore years.

DEPARTMENT OF MATHEMATICS.

To the complete course in pure Mathematics is added the application of Geometry and Trigonometry to Surveying and Elementary Engineering. Compass, Chains, Transit, and all other necessary instruments, are furnished and practically used in the field.

DEPARTMENT OF NATURAL SCIENCE.

Botany and Zoology, commencing in the Winter Term of the Freshman Year, continue through three consecutive Terms. In these branches, the student is brought face to face with nature, and required to make constant observations upon the forms and phenomena of animal and vegetable life about him. Lectures, Recitations, Drill, and Analysis of natural objects, varied according to the nature of the lessons, are in constant use.

PHYSICS AND CHEMISTRY.—No College in America has more complete facilities for obtaining a thorough elementary knowledge of these branches. The costly and splendid apparatus, kept up to the times by occasional additions,—and the Laboratories, abundantly provided with chemicals and facilities for every kind of chemical work, make these studies unusually attractive and satisfactory. The Course requires five consecutive Terms.

MINERALOGY AND GEOLOGY.—After a severe drill with crystallographic models, continuing four weeks, Mineralogy is chiefly taught by the actual examination and analysis of Minerals, with frequent and intelligent use of the College Cabinets. Geology is taught by Recitation, Lectures, Cabinet Illustrations and Excursions. With the exception of Astronomy, all the classes in Natural Science are assigned to the Chair of Physics and Chemistry.

DEPARTMENT OF GREEK.

The amount of Greek required is thought sufficient to give the mind such definite acquaintance with the model of Languages, as to fit it to comprehend and enjoy the pursuit of other Languages. For this purpose it is desirable that the preparatory Greek be studied before the Languages of the Collegiate Course are begun. Seven Terms in the regular College Course are devoted to Greek Classics. Of these the first two are accompanied with exercises in Greek Composition, and the second and third with a weekly recitation in Greek History.

DEPARTMENT OF MODERN LANGUAGES.

The Course in French and German requires two years, and consists of daily Recitations in each of these Languages. The first two Terms are occupied with the Grammar. The student is required the first year to translate every day, upon the black-board, from the English into these Languages. The second year is spent with the Classical Authors, and all Conversation, Criticisms, &c., are carried on exclusively in the language studied. Especial attention is given to speaking correctly and fluently.

VOCAL MUSIC.

Opportunity is offered every term to students desiring instruction in the elements of vocal music, at rates of tuition merely nominal.

ASTRONOMICAL INSTRUMENTS.

By generous donation, Hon. G. B. DELAMATER has furnished an excellent Telescope, 8 feet Refractor, 7½ inches Object Glass, in power capable of separating minute double stars; manufactured by A. Clark & Son, Cambridge, Mass. Also, a superb Transit from the hands of Stackpole Bros., New York. These instruments are temporarily mounted, waiting the erection of a suitable Observatory.

Also, Sextant, Transit with Meridian Finder, Prismatic Compass, and other instruments essential to the department of ENGINEERING, all of first class workmanship, and practically used in the field.

APPARATUS AND CABINETS.

The College is in possession of extensive Cabinets of Mineralogy and

Conchology, and complete Chemical and Philosophical apparatus of the most approved forms, mostly gifts from Hon. C. V. CULVER.

The apparatus comprises several hundred distinct pieces, affording the most ample means of illustrating every branch of Physics and Chemistry now taught in Collegiate Institutions.

Among the more expensive Instruments are the following :

A compound Microscope, with accessories, manufactured by Zentmayer, of Philadelphia, at a cost of about \$500.

A Rumkorff Induction Coil, giving a twelve inch spark, by E. S. Ritchie & Co., of Boston, costing \$525.

A Thilorier's Apparatus for solidifying Carbonic Acid.

Eighteen Instruments to illustrate the Laws of Undulations.

Auzoux' largest size Anatomical Models of the Eye, Ear, Brain, and Larynx.

Apparatus for reproducing Tyndall's experiments on Heat.

A Solar Microscope.

Two Polariscopes with accessories.

A Spectroscope with four Prisms.

Apparatus for projecting optical phenomena on a screen, including a first class double Lantern, adapted to four kinds of light.

The Optical Instruments, excepting the Compound Microscope, Telescope, and Astronomical Transit, were made by M. Duboscq, of Paris.

The Laboratory is stocked with a full assortment of common Chemicals, a Cabinet of rare preparations, and an abundant supply of Apparatus for all chemical purposes—the greater part of which has been imported from Paris and Berlin.

The Cabinet embraces four distinct collections of Minerals and Shells.

1. THE PRESCOTT CABINET, comprising 2,400 specimens of marine, terrestrial and fresh water Shells, and about 3,000 specimens of Minerals and Fossils collected and mounted by Dr. WILLIAM PRESCOTT, of Concord, New Hampshire.

2. THE HALDEMAN CABINET has 550 excellent and carefully labeled specimens of Minerals, and about 2,000 species of Shells, and was purchased by S. S. HALDEMAN, of Columbia, Penn'a.

3. THE ALGER CABINET.—This magnificent collection, made by the late FRANCIS ALGER, of Boston, was purchased at a cost of \$12,000, and contains 5,000 specimens of Minerals, remarkable for their beauty and variety,

many of them unique. It embraces also a large number of duplicates, and a handsome suit of about 1,500 specimens of Shells. This collection is said to have cost Mr. ALGER over \$35,000.

4. CABINET OF LITHOLOGY AND PALÆONTOLOGY.—Arrangements have been made with Prof. HENRY A. WARD, of the University of Rochester, for a Lithological and Palæontological Cabinet of over 11,000 specimens, about 1000 of which have been received. The *Megatherium Cuvierii* and six other large casts are mounted in the former Chapel, which has been fitted up in elegant style for this Geological Museum.

SMITHSONIAN COLLECTIONS.—In addition to several valuable collections heretofore received from the Smithsonian Institution, there has been added a *suite* of over 500 specimens of land, marine and Fresh water Shells, from Panama, Vancouver's Island, and the West Indies, chiefly obtained by the late Prof. C. A. ADAMS, and authentically labeled by H. CUMING and by Dr. P. B. CARPENTER, from the collections of D'ORBIGNY & CUMING.

ENTOMOLOGICAL CABINET.—The collections of the College have just been enriched by the receipt of a superior Cabinet of Insects, embracing 3,000 species, carefully and accurately catalogued and classified. It was arranged by W. O. CURRIER, of Providence, R. I., and donated by a friend of the College.

In addition to the above named collections there are about 1000 Zoological specimens including Birds, Reptiles, Fish, and Marine animals; which are constantly being increased in number by the exertions of the Scientific Club.

These valuable additions will greatly increase the scientific advantages of the College, and furnish special incentives to the study of Natural Science.

MUSEUM OF ART HISTORY.

This collection contains sixty casts of works of Sculpture, two hundred Photographs, and the same number of Engravings. They are so selected as to represent characteristic features of the different periods of the Arts of Architecture, Sculpture, and Painting. Among the casts are :

The Apollo Belvidere—original in the Vatican, Rome.

Niobe—original in the Uffizzi Gallery, Florence.

Venus of Milo—original in the Louvre, Paris.

Polhymnia and Ancyrrhoc—originals in the Royal Museum, Berlin.

The Apostles, Peter, Paul and James, by Peter S. Visser,—its original Sibaldus Church, Nuremberg.

Moses, by Michael Angelo—original in Rome.

The Nuremberg Nun, Statues of Handel and Lessing, Busts of Sophocles, Euripides, Goethe, Schiller, and various Egyptian, Grecian, and Medieval bas-reliefs.

The Royal Museum of Berlin has also presented to the Allegheny College Casts of the celebrated Statue of Diana Colonna, Busts of Alexander the Great and Julius Cæsar, the Wackenroder Memorial, German and Roman Busts, Casts of Indian and Assyrian Sculpture, and a fine collection of original German and Classical Antiquities, consisting of German stone Hammers, Battle-axes, Drinking-vessels, and Greek and Etruscan Vases and Lamps.

A large Chinese, and also a Japanese Painting, have been presented to the Museum.

Rev. Mr. LONG, Missionary to Bulgaria, has presented some Terra Cottas and Coins from Ephesus.

Friends and patrons of the College traveling abroad are invited to add to this Museum works of Art of any kind, but especially Photographs of Historical Works of Architecture, or original Antiquities of any Nation. Copies of the works of native Artists, Memorials of the late war, or any articles to illustrate the history of the Indian or European races in this Continent, will be carefully preserved. SCIENTIFIC CLUB.

An impetus to scientific culture has been given during the past year by the organization of a Society bearing the above name. It is composed chiefly of students, and holds semi-monthly meetings. Its chief objects are the study and collection of the Natural History of the district about Meadville, which is one of extraordinary richness, both as to plants and animals. The Club also provides for regular meteorological observations, and will publish a daily bulletin containing the first Morning Weather Report from the Bureau at Washington.

Its commodious and inviting Hall is always open during recitation days.
